

Material: Mikrofaser
Pflegehinweise: 
Zusammensetzung: 100 % Polyester

Scheuerbeständigkeit: 25.000 Touren
Pillingbildung: 4-5
Lichtechtheit: 5

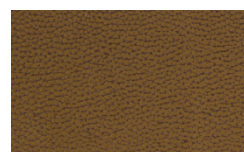

Eigenschaften

Feiner Mikrofaserstoff mit Prägung in Lederoptik. Mikrofaserewebe sind sehr weich in ihrer Haptik, äußerst formbeständig und weisen Fusseln ab. Typischerweise kann es stellenweise zur Bildung kleiner Flusen und Knötchen (Pilling) kommen, welche leicht mit einem Fusselgerät entfernt werden können. Pilling, Farb- oder Strukturabweichungen sind warentypisch und berechtigen nicht zur Reklamation. Direktes Sonnenlicht vermeiden.
